- Design System Implementation
- Performance Optimisation
- State Management
- API Integration
- SEO & GEO Optimisation
- Conversion Rate Optimisation
- W3C & WCAG Web Standards
- Semantic HTML
- Responsive Web Design
- CI/CD & Deployment Workflows
- Version Control & Branching
- Cross-Browser Compatibility

LUKE DE KIEWIT

< FRONT-END ENGINEER />

PROFESSIONAL EXPERIENCE

> FRONT-END ENGINEER • BITCUBE • MAY 2024 – MAR 2026

I began my career at Bitcube in the Ecommerce department in May 2024, specialising in Shopify theme and storefront development. Focusing on responsive design, performance, accessibility, semantic markup and improving conversion. I collaborated with a team of developers, designers and quality-assurance engineers to build, maintain and deliver bespoke solutions for prominent high-end luxury and contemporary fashion clients across the UK, EU, and US.

I transferred to the Engineering department in July 2025, moving from Ecommerce into more technical development work. I collaborate with different teams to build and maintain front-end systems for UK and EU-based clients, primarily in the renewable energy and maritime logistics sectors, as well as internal projects at Bitcube.

> JUNIOR FRONT-END DEVELOPER • SOCO_ED • JAN 2023 – MAR 2024

I worked on a range of SaaS projects, building, maintaining, and extending custom systems for several clients, including leading universities in South Africa. I led front-end development for numerous UI/UX features and improvements on the Topic LMS and similar platforms.

> DEVELOPMENT INTERN • CONDENSATION • SEP 2022 – OCT 2022

I worked with a team of development interns to build and maintain front-end UI components for PHP-based platforms and static websites.

PUBLIC PROJECTS

> ATOMWAVE COMPONENT LIBRARY • 2025/26

My most ambitious project to date, due for completion in late 2026. Atomwave is a rewrite of shadcn/ui without a Tailwind dependency, offering additional components, greater flexibility, and built-in support for multiple themes.

> MARLIN BROKERS • 2024

A complete rebuild of the Marlin Brokers website from scratch, transforming an outdated and slow WordPress site into a clean, fast, SEO-optimized website built with Astro, React, and Tailwind.

> TOPIC LMS • 2023

An educational platform for high school students in Grades 10-12, supporting the education of over 200,000 learners across South Africa. Built with Next.js, React, Tailwind, and Strapi.

EDUCATION

> CTU TRAINING SOLUTIONS • 2022

National Certificate: IT Systems Development (NQF 6)

> CTU TRAINING SOLUTIONS • 2021

FET Certificate: IT Systems Development (NQF 5)

> CTU TRAINING SOLUTIONS • 2020

FET Certificate: IT Database Development (NQF 4)

> GREY COLLEGE SECONDARY • 2019

National Senior Certificate
